### **Biofiltration™**

Purple Needlegrass – *Nassella pulchra*

Molate Fescue – *Festuca rubra*

California Barley – *Hordeum californicum*

Meadow Barley – *Hordeum branchyantherum*

A combination of dryland and wetland species that can tolerate drought conditions and limited amounts of standing water. Provides excellent stabilization and erosion control.

- A combination of coarse & fine bladed grasses that create an excellent weed barrier
- Reduces soil erosion
- Adapts to most soil types
- Excellent heat tolerance
- Recharges and purifies ground water
