

PRODUCERS & INSTALLERS OF PREMIUM PEAT GROWN SOD

GROWN ON DEGRADABLE NETTING

California Native Sod™

Biofiltration™

Purple Needlegrass – *Nassella pulchra*

Molate Fescue – *Festuca rubra*

California Barley – *Hordeum californicum*

Meadow Barley – *Hordeum branchyantherum*

A combination of dryland and wetland species that can tolerate drought conditions and limited amounts of standing water. Designed for ecological restoration projects, it offers outstanding soil stabilization and long-term erosion control across a range of site conditions.

- A combination of coarse & fine bladed grasses for dense coverage and weed suppression
- Reduces soil erosion and stabilizes disturbed areas
- Adaptable to a wide range of soil types
- Excellent heat tolerance for resilient performance in high temperatures
- Promotes groundwater recharge and natural filtration through deep rooting
